JENA · STUTTGART · NEW YORK

Inhaltsverzeichnis Band 148/1993

Abd-Alla, M. H., and Omar, S. A.: Herbicides effect on nodulation, growth and nitrogen yield of faba bean induced by indigenous *Rhizobium leguminosarum*. 593

Abdel-Fattah, A. F., Ismail, A. S., and Saleh, S. A.: Production and some properties of fibrinolytic enzymes from *Fusarium oxysporum* N.R.C.1 117

Abdel-Fattah, A. F., Ismail, A. S., and Saleh, S. A.: Purification and properties of two fibrinolytic enzymes from *Fusarium oxysporum* N.R.C.1 123

Abd El-Hady, F. K., and Ouf, S. A.: Fungitoxic effect of different substances from *Solenostemma argel* (Del) Hayne on some shoot surface fungi 598

Abdel-Hafez, A. I. I., and Saber, S. M.: Mycoflora and mycotoxin of hazelnut (*Corylus avellana* L.) and walnut (*Juglans regia* L.) seeds in Egypt. 137

Abdel-Mallek, A. Y., s. El-Kady, I. A. 549

Abdel-Moneim, A. A., Ali, F. S., and Hammad, A. M. M.: Interaction between rhizosphere microflora of *Vicia faba* and certain pathogenic root infecting fungi. 39

Abdel-Raheem, A. M., s. El-Hissy, F. T. 535

Abdel-Sater, M. A., Khallil, A. M., Ismail, M. A., and Ahmed, S. A.: Effect of paraquat and ametryne on soil, root and leaf-surfaces fungi of *Solanum tuberosum* L. 558

Abdel-Sater, M. A., s. El-Maghraby, O. M. O. 253

Abou-Zeid, A. A., and Khoja, S. M.: Utilization of dates in the fermentative formation of citric acid by *Yarrowia lipolytica*. 213

Abou-Zeid, A. A., Baeshin, N. A., Baghlaf, A. O.: Utilization of date products in production of oxytetracycline by *Streptomyces rimosus* 333

Abou-Zeid, A. A., Khan, J. A., Abulnaja, K. O.: Oxytetracycline formation in blackstrap molasses medium by *Streptomyces rimosus* 351

Abou-Zekry, S. H., s. Helemish, F. A. 582

Abulnaja, K. O., s. Abou-Zeid, A. A. 351

Ahmed, S. A., s. Abdel-Sater, M. A. 558

Algawadi, A. R., s. Pakale, N. 523

Ali, F. S., s. Abdel-Moneim, A. A. 39

Badura, L., Piotrowska-Seget, Z., Szeligiewicz, M.: Lead-induced changes of rhizospheric bacterium populations in different root zones 432

Baeshin, N. A., s. Abou-Zeid, A. A. 333

Baghlaf, A. O., s. Abou-Zeid, A. A. 333

Bagy, M. M. K., s. Hemida, S. K. 148

Bagy, M. M. K., Hemida, S. K., and Mahmoud, U. M.: Terrestrial fungi inhabiting certain species of Nile fishes in Egypt 289

Bagy, M. M. K., and Hemida, S. K.: Response of soil fungi to the herbicide Primextra 298

Balandreau, J., s. Omar, M. N. A. 284

Berge, O., s. Omar, M. N. A. 284

Börner, H., und Zunke, U.: Praktikum der Phytopathologie B 486

Boley, A., s. Müller, H.-M. 419

Brandt, P.: Evolution der eukaryotischen Zelle B 587

Bringi, V., s. Payne, G. F. B 342

Burckhardt, F.: Mikrobiologische Diagnostik B 78

Canela, R., s. Garza, S. 343

Chandra, A. K., s. Pati, B. R. 392

Chattopadhyaya, N., and Dey, B. K.: Chemoheterotrophic sulfur oxidising microorganisms of a terai soil I. Oxidation of inorganic and organic sulfur by microorganisms, isolated in sucrose-sodiumthiosulfate agar 517

Čik, G., s. Sroková, I. 247

Dahm, H., Rózycki, H., Strzelczyk, E., and Li, C. Y.: Production of B-group vitamins by *Azospirillum* spp. grown in media of different pH at different temperatures. 195

Dey, B. K., s. Chattopadhyaya, N. 517

Dimitriou, D., s. Maipa, V. 66

Dinjus, U., Steinbach, G., Methner, U., Hänel, I., Schulze, P.-U., und Schweinitz, P.: Investigation of the ability of toxin production among *Salmonella* strains of bovine origin 95

Eberbach, W., und Ferdinand, F.-J.: Gentechnikrecht (Gen TR) B 276
El-Hissy, F. T., Khallil, A. M., and Abdel-Raheem, A. M.: Effect of some heavy metals on the mycelial growth of *Achlya racemosa* and *Alatospora acuminata* 535
El-Kady, I. A., El-Maraghy, S. S. M., Abdel-Mallek, A. Y., and Hasan, H. A. H.: Effect of four pesticides on aflatoxin production by *Aspergillus flavus* IMI 89717 549
El-Maghraby, O. M. O., and Abdel-Sater, M. A.: Mycoflora and natural occurrence of mycotoxins in tobacco from cigarettes in Egypt 253
El-Maraghy, S. S. M., s. El-Kady, I. A. 549
El-Mokadem, M. T., s. Helemish, F. A. 582
El-Sayed, S. A., s. Omar, M. N. A. 284
El-Shahed, K. Y., s. Farid, M. A. 277
Eraki, H. M., s. Ghanem, E. H. 441
Erler, W.: The localization of toxin in the cells of *Pasteurella multocida* 83
Fadel, M., and Fouda, M. S.: Physiological studies on xylanase production by *Penicillium funiculosum* on some agricultural wastes 304
Farid, M. A., and El-Shaded, K. Y.: Cellulase production on high levels of cellulose and corn steep liquor 277
Ferdinand, F. J., s. Eberbach, W. B 276
Fiedler, B., s. Geitel, B. 205
Fouda, M. S., s. Fadel, M. 304
Frank, V., Támová, G., and Takácsová: Effects of cadmium and mercury on growth and differentiation of *Trichoderma viride* 229
Frank, T., and Malkomes, H.-P.: Influence of temperature on microbial activities and their reaction to the herbicide "Goltix" in different soils under laboratory conditions 403
Gaddagimath, N. B., s. Sreenivasa, M. N. 55
Garza, S., Canela, R., Viñas, I., and Sanchis, V.: Effects of potassium sorbate on growth and penicillic acid production by *Aspergillus ochraceus* and *Penicillium aurantiogriseum* 343
Geitel, B., Ryl, W., Fiedler, B.: Microbial hydrolysis of inulin-containing juice from Jerusalem artichoke to fructose-syrup 205
Ghanem, E. H., Mussa, M. E., and Eraki, H. M.: *Aeromonas*-associated gastroenteritis in Egypt 441
Glante, F., s. Höflich, G. 48
Goodfellow, M., s. Stackebrandt, E. B 194
Griesbach, E., s. Naumann, K. 451
Gupta, M., s. Maheshwari, D. K. 588

Name und Subject Index

Achlya racemosa 535
Acifluorfen 16
Actinomycetes 467, 477
Aeromonas 441
Aflatoxin 137, 253, 325, 543, 549
Agglutination assay 379
Alatospora acuminata 535
Alfalfa 177
Ametryne 558
Ammonifiers 365
Ammonium oxidation 523
Antagonists 32, 237, 487
Antibiotics 88, 103, 451
Apothecia formation 32
Apple repland discase 467, 477
Apple root infection 467, 477
Aspergillus 289
Aspergillus flavus 549
Aspergillus ochraceus 343
Azospirillum 195
Baby mouse test 95
Bacterization 487
Bacterization, combined with fungi 48, 163, 315
Bacterization, growth stimulation 48, 315
Benlate 570
B-group vitamins 195
Biomass-persistence 16
Brevianamide A 419
Cadmium 229, 265
Calendula officinalis 223
Campylobacter 3
Capsicum annum 55
Cellulase production 277
Cellulolytic microflora 365
Cellulose decomposition 24
Cement dust, fungi flora 148
Cereal infection 129
Chymotrypsin 247
Citric acid formation 213

Coconut 325
Copper 265
Crown rots 74
Cylindrocarpon destructans 65
Cyst nematodes 109

Date fruits 213
Date products 333
Diazotrophs 392
Dinoterb 24
Drinking water pollution 441

Ecotoxicology 497
ELISA 379
Enterotoxin 95
Enzyme immobilization photochemical 247
Ergosterol 419
Erwinia amylovora 379
Erysiphe graminis f. sp. *hordei* 413

Fababeans 177, 593
FDA-hydrolase activity 16
Feta-cheese 66
Fibrinolytic enzymes 117, 123
Fructose-syrup 205
Fungi 325
Fungi flora, cement dust 148
Fungi in fishes 289
Fungicides 357, 365, 483, 497, 570
Fungitoxicants 598
Fusarium 129
Fusarium oxysporum 74, 117, 123
Fusarium solani 74, 505

Gastroenteritis 441

Hazelnut mycoflora 137
Heavy metals effects 229, 265, 487, 535
Herbage 103
Herbicides 16, 24, 298, 403, 593
Heterodera goettingiana 09

Immigration 223
Immunofluorescence technique 379
Inhibitory action of lead 265
Inulin hydrolysis 205
Invertase 505

Jerusalem Artichoke juice 205

KH_2PO_4 351

Lactic acid bacteria 103
Leachates 570
Lead 432
Leaf surface microorganisms 392
Legumes rhizosphere 357, 365
Lipase 543
Lipooligosaccharides 3
Lucerne 163

Mercury 229
Metamitron 403
Molasses, blackstrap 351
Mucor thermophilus 531
Mucorales 531
Mutation with cadmium 229
Mutation with mercury 229
Mycoflora, hazelnut 137
Mycoflora, tobacco 253
Mycorrhiza of chilli 55
Mycotoxins 103, 129, 137, 253, 325

Nectria haematococca 505
Neutral red 11
Nile blue 11
Nitrate reductase 588
Nitrification 24, 523
Nitrite reductase 588
Nitrogen fixation 177, 392, 593
Nitrogen mineralization 403
Nitrogen sources 505
Nitrogenase 163
Nodulation 163, 582

Ochratoxins 325
Optimization of cultivation medium 277
Osmophilic fungi 137
Oxygen uptake 588
Oxytetracycline 333, 351

Paraquat 558
Pasteurella multocida 83
Pasteurella toxin 83
Pasteuria, life-cycle 109
Pasteuria nishizawae 109
Pasteuria penetrans 109
Pathogenic fungi 39, 451
Pathogenic microflora 39
Pea 48, 177, 315
Peanut 60
Pencycuron 497
Penicillic acid 343
Penicillium in fishes 289
Penicillium aurantiogriseum 343
Penicillium funiculosum 304
Pesticides 60, 497, 549
Photochemical enzym immobilization 247
Phylloplane 103
Phyllosphere bacteria 392

Plant-growth promotion 163
Plant pathogens 451
Plant signal substances for actinomycetes 467
Potassium sorbate 343
Powdery mildew 413
Primextra 298
Propyzamid 24
Protease activity 505
Protein content 505
Proteinase, alcalic 247
Proteolytic bacteria 365
Protoplasts fusion 11
Pseudomonas 163
Pseudomonas fluorescents 88, 237, 487
Puccinia lagenophorae 223
Purification of enzymes 123
Pythium aphanidermatum 237

Rabbit ileal loop test 95
Rape 32
Refrigerated storage 419
Rhizobium 48, 163, 315, 582, 593
Rhizobium inoculation 177
Rhizobium leguminosarum 588
Rhizoctonia solani 237
Rhizosphere microflora 357, 432
Root rots of red clover 74

Salmonella, in bovine 95
Salmonella enteritidis 66
Salmonella, enterotoxin 95
Sclerotinia sclerotiorum 32
Seed dressing 357
Seed germination 570
Seed treatment 497
Seedborne fungi 137, 570
Selective media 88
Senecio vulgaris 223
Serological methods 379
Sesamum 483
Sesbania sesban 582
Shoot surface 598
Silage 103
Skin permeability factor test 95
Soil bacteria 432
Soil enzymes 403
Soil fungi 298, 558
Soil microbial activities 403, 451, 497
Solanum tuberosum 558
Solenostemma argel 598
Soybean 177
Specific apple replant disease 467, 477
Spice oils 543
Starvation-survival 3
Sterigmatocystin 543
Streptomyces rimosus 333, 351
Sulfur oxidising microorganisms 517
Survival strategies 379, 451

T-2 toxin 253
Temperature influence 195, 403
Tissue culture assay 95
Tobacco 253
Tolclofos-methyl 497
Toxin-localization 83
Trichoderma 289
Trichoderma reesei 277
Trichoderma viride 229

Uptake hydrogenase 163
Urea 523

VA-mycorrhiza 48, 60, 483
Vicia faba 39
Viomellein 419
Virulence 95

Wheat 419

Xanthomegnin 419
Xylanase 304

Yarrowia lipolytica 213
Yeast-strains 205

Zearaleone 137, 253
Zinc 265
Zoosporic fungi 148
